Food is one of the basic necessities of humans, and it stands first among all basic needs of food It is important as it nourishes the human body- sustaining the very existences of humans. However, with the rising population and development of this country, food wastage has risen to a new high. There are many people who wish to donate food to the needy but are unaware of how exactly they can execute . The donors shall be able to see a plurality of options by which they can donate. The BRAINSTORMERS CLUB will get the details of the persons wishing to donate via our application and thus a network is established between donors, people who aid the donors in donating and the actual needy people to whom the donated item is sent.
